

Nanomaterials 2026: Innovations and Future Perspectives

List of Posters

sciforum

MDPI 30

Poster Session A

Tuesday, 17 March 2026

Number	Author	Title
1	Agnieszka Sobczak	A Lipid Nanoformulation–Loaded Hydrogel as a Novel Topical Delivery System for Plant-Based Active Compounds
2	Bratislav Antic	Smart MOF–Maghemite Hybrid Nanostructure for Multifunctional Therapeutic Applications
3	Elif Demir	Investigation of Cell Viability and Localization in Green Synthesized Carbon Quantum Dots from Turkish Coffee Ground Waste with Different Roasting Levels
4	Jagoda Szkudlarek	Comparative Evaluation of Niosomal Drug Delivery Systems Containing 20-Hydroxyecdysone for Potential Psoriatic Therapy
5	Joanna Czerniel	Lipid-Based Nanoformulations of 20-Hydroxyecdysone: A Comparative Study of Liposomes and Ethosomes
6	Johana Janina Zuñiga Miranda	From Amazonian Plant to Antimicrobial Nanomaterial: Phytosynthesis of Silver Nanoparticles Using <i>Cecropia peltata</i> L., Antibacterial, Antimycotic, and Hemolytic Activity
7	Katerina Mihaylova	Impact of Ball Milling Activation on the Crystal-Chemical Properties of Synthetic Nano-Fluorapatite
8	Loreto Hernandez	Covalent Immobilization of Ki-67 and VP2 Antibodies on Polypyrrole–Silver Interfaces for Electrochemical Immunosensing
9	Maria Dąbkowska	Albumin-Based Nanoplatfrom for Anti-Angiogenic Protein Delivery in Cancer Therapy
10	Alexandru Tanase	Electrospun Perovskite Nanofibers: Synthesis and Properties for High-Temperature Electrolyzers (X-Seed Project)
11	Nino Maisuradze	Fabrication of Superparamagnetic Nanofiber Composites via Electrospinning of Citric Acid-Coated Iron Oxide Nanoparticles
12	Simone Serrecchia	Lignin Nanoparticles from Agro-Waste as Bio-Reducers and Metal Concentrators in Functional Nanofibrous Sensors
13	América Jeannine Milanés	Refractive Index Sensor for Chemical Compound Detection Using the SPR Technique and Optimized MIM Nanostructures
14	Henry Gauder	Sculpting Chirality at the Nanoscale: Size-Dependent Enantioselectivity in Nanoparticles from MD and DFT
15	Biljana Dojcinovic	Fast Arsenic Uptake from Natural Waters by UiO-66-NH ₂ : Selectivity, Kinetics and Mechanistic Insight
16	Gabriela Ambrožić	When Atomic Layer Deposition Meets Click Chemistry: Sustainable Pathways in Nanomaterial Design

17	Selin Tan	Investigation of the Effects of PEG Molecular Weight on Cell Viability and Cellular Localization of PEGylated Carbon Quantum Dots
18	Jorge Alberto Vieira Costa	Development of PLA Nanofibers with Scenedesmus Biomass for Applications as Biofertilizers
19	Pooja Negi	Protein-Encapsulated DNA Metal Nanoclusters: A Strategy to Design Fluorescent Nanoprobe for Detecting Insulin Biomarker for Diabetes
20	Rosa Garriga	Loading of Fluorescent Anticancer Drug Coralyne Into Micelles, Liposomes and Peptide Self-Assemblies
21	Jessica Millen	LLM-Driven Knowledge Extraction for Noble Metal Nanomaterial Discovery and Applications
22	Elisabetta Esposito	In Situ Forming Gels for Subcutaneous Delivery of Curcumin and Piperine

Poster Session B

Wednesday, 18 March 2026

Number	Author	Title
1	Mekal Tbaa	Shape and Size-Dependent Effects of Silver Nanoparticles on Cell Viability and Apoptotic Pathways
2	Paweł Bakun	Transferosome-Based Nanoparticles with 20-Hydroxyecdysone of Potential Application in Psoriasis Treatment - Preliminary Studies on Modern Dermal Delivery Formulations
3	Shou-Mei Wu	Iron Oxide Nanoparticles for Absorptive Concentration of Dopamine and Levodopa in Human Plasma and Determined in On-Line Stacking Capillary Electrophoresis
4	Stoyanka Atanasova Nikolova	From Microalga to Nanomaterials: Green Synthesis of Silver Nanoparticles from <i>Spirulina platensis</i>
5	Violetta Krajka-Kuźniak	Topical Nanocarrier Formulation of 20-Hydroxyecdysone for Psoriasis: In Vitro Viability Profiling in Human Epidermal Keratinocytes (HEK) and Psoriasis Patient-Derived Keratinocytes (PHEK) Using the MTS Assay
6	Gerard Pérez-Pi	Nanomaterials for Li-ion Batteries (AM4BAT Project)
7	Maša Hren	Functionalized Biopolymer-Based AEMs Crosslinked with Genipin for Alkaline Fuel Cell Applications
8	Laura Jug	Influence of MAX Phase Particle Size on the Structure and Electrochemical Behaviour of $\text{Ti}_3\text{C}_2\text{T}_x$ nanoparticles and MXene-Based Textile Electrodes
9	Jincymol Kappen	Nanostructured Graphene-Gold Composites for Ultrasensitive Detection of Ovarian Cancer Biomarker
10	Anastasios Papadimitrakopoulos	FAIR Data Principles and AI Ethics: Exploring Convergence and Gaps
11	Rumiana Kotsilkova	Electroactive Shape Memory Nanocomposites Based on Biodegradable Polymers and Graphene for 4D-Printing Applications
12	Sergi Vilaró	Metal-Doped Carbon Nanofiber Electrodes for Efficient Hydrogen Production in AEM Electrolyzers (StackAEM Project)
13	Juliana P.S. Sousa	Fluorine-Free Hydrophobic Coating Approaches to Protect Painting Equipment
14	Michele Greque de Moraes-Costa	Modulation of Pigment and Exopolysaccharide Production in <i>Porphyridium purpureum</i> via Functionalized Polymeric Nanofibers
15	Shadi Al-Nahari	Bottom-up Synthesis for Fabricating Defect-Free Two-Dimensional MoS ₂ Sieving Membranes

16	Tânia Grainha	Optimization of Fixed-Bed Column for Chlorobenzene Removal from HCl Streams
17	Zahra Yamani	Effects of Neutron Irradiation on Boron Nitride and Thermoplastic Polyurethane Nanocomposites Considered for Shielding in Space
18	Jessica Millen	Quality Assurance and Operationalisation of Datasets for Analysing Nanomaterial Dissolution Behaviour
19	Guido Fellet	Effects of Two-Dimensional Nanoparticles on Seed Production of Tobacco and Maize
20	João S. Oliveira	High-Filtration Antibacterial Electrospun Nanofibers for Next-Generation Facemask Filters
21	Abdulrahman Shaar	Stabilization of Silver Nanoparticles Using Gold–Silica Coatings for Cancer Diagnostics
