Conference Announcement

On behalf of the MDPI journal *Toxics* (ISSN: 2305-6304; Impact Factor: 4.1) and its Scientific Committee, we are pleased to invite you to participate in the 3rd International Online Conference on Toxics (IOCTO2026). This meeting will be held online from 9–11 September 2026.

The aim of this platform is to bring together students, researchers, and scientists from around the world to present their work and exchange ideas on the exposure, effects, and risks regarding chemicals and materials in terms of humans and the natural environment, as well as on the development of new approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials.

The topics are organized into five sessions, corresponding to the following journal sections:

- S1. Exposure Routes / Exposome of Emerging Contaminants and Materials in the Environment;
- S2. Wildlife Ecotoxicology, Sentinel Species, and Ecosystem Health;
- S3. Innovating Toxicology: NAMs and Computational Tools for Next-Generation Risk Assessment;
- S4. Molecular and Cellular Mechanisms, Comparative Toxicology, and Multi-Omics Integration;
- S5. Risk assessment, Policy, and Environmental Justice in Chemical Safety.
