

Symmetry 2023 - List of Posters

Poster Number	Author Name	Title
1	Alexander Shelupanov	Methodology for the development of structural and functional security models for elements of distributed information systems
2	Alexander Shelupanov	Methodology for determining scenarios for the implementation of threats to information security
3	Angela Bašić-Šiško	A spherically symmetric model of a micropolar real gas flow
4	Ivan Dražić	Numerical simulations for viscous and heat-conducting micropolar gas flow with cylindrical symmetry
5	Masahiko Taniguchi	Cartan F(R) gravity and cosmological accelerated expansion
6	Daniel Martínez-Fernández	Local and Global Order in Dense Packings of Semi-flexible Athermal Polymers
7	Adrianna Cyraniak	Quasidegeneracy of $(H_2C=B=CH_2)^-$ and $(H_3B-C\equiv CH)^-$ systems induced by an excess electron attachment
8	Sonia Mihai	Au/TiO ₂ nanosheets for photocatalytic degradation of methylene blue under simulated visible light
9	Eleonora-Mihaela Ungureanu	Studies on tetrahydroacridines to investigate possible application in Alzheimer disease treatment
10	Eleonora-Mihaela Ungureanu	In silico approaches for rational design of new electrochemical sensors based on azulene-phenyloxazolone
11	Maba Boniface Matadi	Lie Theory: Applications to Mathematical model describing HIV-Immune System
12	Yolanda Guerrero-Sánchez	Detection of brain gene expression images based on image processing techniques
13	Abbas Al-Refaie	Effects of Competition and Advertisement on Rooftop PV System Installations Using System Dynamics
